PROFESSIONAL SUMMARY

Full-stack software developer in the Philippines, available for hire, building production web applications and B2B platforms since 2018. Key contributor to the August 2026 launch of VinAudit Data. Designs the interfaces people use. Skilled in Next.js, React, TypeScript, PHP, WordPress, Strapi, Cloudflare, and API integrations.

TECHNICAL SKILLS

Frontend Development: HTML, CSS, JavaScript, TypeScript, React, Next.js 15, Vue.js, Tailwind CSS, Responsive Web Design

Backend and CMS: PHP, REST APIs, WordPress, Strapi 5, MySQL, PostgreSQL, Cloudflare D1

Cloud and Infrastructure: Cloudflare, Cloudflare Pages, Cloudflare Workers, Git, GitHub Actions, CI/CD workflows

Analytics, AI, and Integrations: Gemini API, Google Analytics 4, Google Tag Manager, reCAPTCHA, Postmark, Postman, API Integrations, Web Application Security, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Developer, VinAudit

April 2021 - Present

- Develop and maintain public automotive web products and B2B data experiences, including features, external APIs, deployment, QA, and production support.
- Helped deliver VinAudit Data from early portal development through its August 2026 launch: product pages, content management, registration journeys, API trial experiences, and lead workflows.
- Integrated Google Analytics 4 and Google Tag Manager conversion events, supported performance and security improvements, and contributed to payment and subscription integrations.
- Use Next.js, React, TypeScript, PHP, WordPress, Strapi, REST APIs, and Cloudflare in this role.

Frontend Developer, Future Tranz Solutions Inc.

September 2018 - April 2021

- Developed Vue.js CRM interfaces, interactive business dashboards, and responsive screens, and integrated REST APIs.
- Collaborated with developers and designers on business web applications.

SELECTED PROJECTS

VinAudit Data | https://data.vinaudit.com/

Automotive Data API for B2B Clients. Launched August 2026. Contributed to the platform's development and production launch, implementing customer-facing experiences, onboarding workflows, API testing features, CMS integrations, analytics, and AI-assisted lead classification.

VinAudit | https://www.vinaudit.com/

Vehicle History Report Website. Developed and maintained the vehicle history report website, implemented API-connected features, supported performance optimization, improved production security controls, and contributed to application maintenance and integrations.

VINCheck.info | https://www.vincheck.info/

Vehicle History Report Website. Contributed to the website redesign, developed API integrations, improved the user experience, supported analytics implementation, and contributed to deployment and production improvements.

AutoPeek | https://www.autopeek.com/

Vehicle History Report Website. Developed and optimized the vehicle history report website, implemented payment-related integrations, supported API integrations, and improved performance and production reliability.

EDUCATION

Bachelor of Science in Computer Science, Xavier University - Ateneo de Cagayan
